We Bring Exhibits to Life -

Our clients design, fabricate and maintain stunning exhibits. They deliver education, entertainment and accessibility to thousands, sometimes millions, of visitors.

When they need audio handsets, they need ones that suit various a-v configurations. They want equipment that's cost effective, good looking, reliable and great sounding. We've got that covered and we've added extra value by integrating disability access accommodations as well.

We know what it takes to support exhibits in high profile, high traffic environments. We've been doing it since 1990 for national monuments, parks and visitor centers; for corporate expos and halls of fame; for music museums, science museums and seven Presidential libraries.

Expect us to deliver Value for Money through the entire work scope. SoundStik systems get the job done.

Sincerely,

Martha B. Yaney
Owner/CEO

SOUNDSTIK® classic

For sound without spillover

If you want to install it and forget about it, get a SoundStik. Five years later it will still be working.

Dave Assal
db-mediainc.com

Add audio impact. Reduce noise pollution.

Easy to use, tough to break, backed by over-the-top service. SoundStik-classic handsets give you value for the money.

- Looking for ease of use? Visitors lift to listen.
- Wish it would start the audio program on lift? or turn on an LED? Or silence the speaker when hanging up? We'll build in a switch. How about a push button for a second language?
- Want multiple SoundStik handsets at one source to play until the last one is hung up? You can do it.
- Need easy installation? Works with any sound source. Two wires for audio, two more for a switch. Plug and play wiring or not as you prefer.
- Need low maintenance? Hook up the adjustable length internal restrainer for vandal resistance.

Call Vista Group to discuss your application.

SOUNDSTIK[®] amp

When you need to keep video kiosk clusters quiet

Photos courtesy of
Videasonic Systems, Inc.

More immersive. Less noise.

Silent movies were exciting in their day. Now not so much. Give your visitors great sound and maintain a quiet ambiance. Vista's convenient SoundStik-amp audio handsets are chock-full of features to give long lasting value for the money.

Visitors lift and listen. Speaker is silent when hanging up.

- Competing loudspeakers and ambient noise? Increase intelligibility even in noisy environments with personal listening boosted by volume control that automatically resets.
- Are your visitors getting the whole picture? Add audio to provide the other half of the story. Speed comprehension and simultaneously add extra enjoyment and meaning.
- Want to meet disability compliance standards? We can help.

Designed to make the whole work scope easier and better, the SoundStik-amp is an ultra-reliable upgrade for any exhibit with a story to tell.

A self-contained sound system

Fortify your exhibit with CD quality sound and disability access compliance by using a convenient SoundStik-mp3 audio handset.

Visitors lift and listen. Program starts automatically.

- So much to see? Bring out the best with a highlight tour and simultaneously accommodate visitors who have low-vision.
- Static exhibit? Give it energy with character voices, music and sound effects.
- Visitors ignoring your text panels? Expand your reach to visitors who are expecting multimedia.
- Competing with ambient noise? Increase intelligibility and reduce noise pollution with personal listening. Adjustable volume helps visitors who are hard-of-hearing and it resets automatically for the next user.

An all-in-one solution for exhibit interpretation, the SoundStik-mp3 is designed for simplicity and reliability from start to finish.

Contact us to discuss your application.

SOUNDSTIK® vcx

For VCX150 Auto-Reset Volume Amplifier

PNC Bank Legacy Project, Pittsburgh
Design, Media and Fabrication by
Quatrefoil Associates

Offering 6 new solutions for listener adjustable volume with auto-reset

The SOUNDSTIKvcx is a companion audio handset for Vista Group's external volume resetting amplifier. The combination gives audio-visual designers new tools for offering personalized audio at exhibits, kiosks, and interactive displays. In addition, it helps exhibits comply with accessibility regulations.

Visitors lift the SOUNDSTIKvcx handset and start playback of the soundtrack or audio program. They can adjust volume to their preferred level while listening. The VCX150 will hold the volume until the visitor finishes listening. Then it resets.

Available options: Hanger Mount, remote audio jack, client device control switch.

Call us to find out more.

We Bring Exhibits to Life

VCX 150 Modes

- 1) Typical push button start
- 2) Invert
- 3) Follow
- 4) Silence detect
- 5) Mute on Hang Up
- 6) Earphone Detect

SOUNDSTIK® *Portable Consoles*

All-In-One Kiosks: Performance and Reliability

With a SoundStik Console, you will have the freedom to offer an interactive display anywhere you want. Use it in your entryway to welcome visitors. Present interviews with board members to encourage donations and memberships. Lend it to the library or nature center as a table top travelling exhibit and promote your events.

Versatile configurations. Industrial strength. Easy to clean. Helps visitors who have low vision or who are hard-of-hearing. Engineered and assembled in America.

SOUNDSTIK iPad Console

Load your video onto the iPad and let the soundtrack play. SoundStik handsets are silent when hanging up and play on lift. Built-in loudspeakers for a classroom group.

Great for looping videos.

SOUNDSTIK-mp3 Console

Mount your graphic, photo, or brochure holders on the panel. Copy your mp3 file to our handsets by USB/SD. You're ready to go.

Ideal for frequently changing messages.

*AVAILABLE OPTIONS INCLUDE: Donor nameplates • Earphone jack for BYOD headphones. • Mini public address system
Braille plates • Language labels. FINISHES: natural cherry, cherry sorrel, custom*

DIMENSIONS: Front Panel: 22" x 15" panel, Console: 10"H, 22"W, 15.5"D" **WEIGHT:** 23 pounds

Differentiators

Value for Money

We design our products to be rock-solid for long-term public use and abuse. Easy to install. Easy to use. SoundStik cases are eco-friendly as well as high impact resistant, high stress resistant and fire resistant. Vista Group service and parts prevent waste; and we back up our work with the longest warranties in the business.

Only Audio Handset to Meet Accessibility Regulations

SoundStik models meet ANSI/EEE Std. C63.19-2007 HAC, ADA, and Section 508 standards.

Ralph Appelbaum Inspired SoundStik® Case

Simple architectural lines—stylish, but unobtrusive. Designed and manufactured specifically for museums and tourist attractions. Custom colors, text or logo etching available.

Versatile

Broader choice of features to suit your needs. Custom systems. Content development, editing, production or translation.

Tops in Service

Our client list tells the story. Friendly, knowledgeable support from start to finish. We do what it takes to assure our products merit your trust.

US-Based Manufacturer

Our proprietary products are designed, engineered, assembled, programmed and serviced in America from US and globally sourced components.

Martha Yaney is a co-founder of Vista Group International and has been owner and president since 2011. She is a Connecticut Council of Technology “Women of Innovation®” 2015 Honoree.

4 MORE WAYS TO BRING EXHIBITS TO LIFE

Just tell us what you want your visitors to experience. We can help you short cut the maze of alternatives and provide a wide range of content services.

1 Personalize kiosk listening experiences

Add volume control with auto-reset for BYOD headphones or low power speakers by using our VCX-150 amplifier. Plugging in headphones can start a program.

2 Guide group tours like the pros

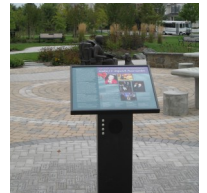

You've trained the docents, but if visitors can't hear, their tour will be disappointing. Tour guide systems work like micro radio stations. Guides can speak in normal tones, even softly.

3 Keep in touch with apps

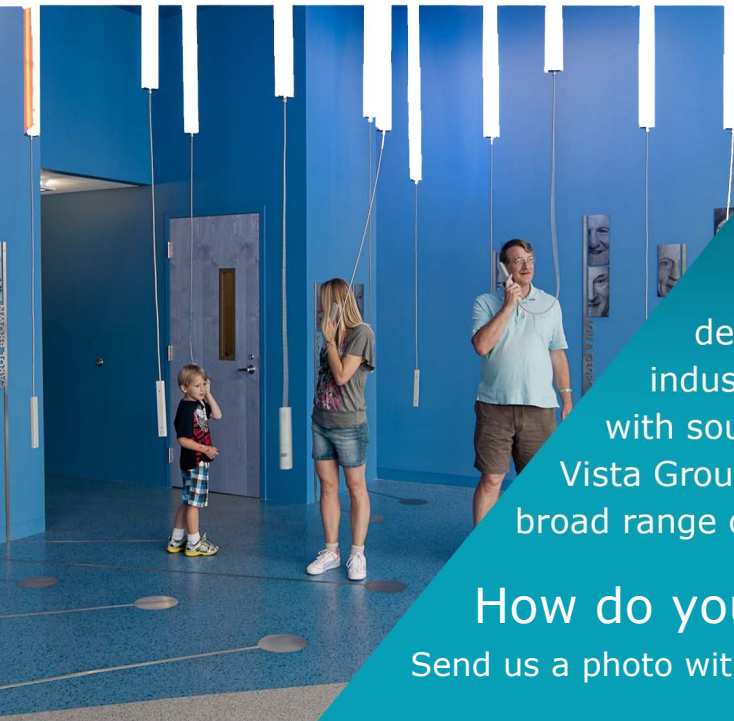

Adding a mobile app to your offerings can generate new visits and create extended connections to your visitors. Museum audio tours, GPS tours, bus tours, e-commerce, ticketing and more.

4 Tell your story rain or shine

When you can't staff outside exhibits, our SoundPost audio signs can be your story tellers. Powered by mains, batteries or solar cells.

Call us to discuss your application

Vista Group International

Vista Group International works with exhibit designers in the museum, trade-show and tourism industries who are seeking to enhance their exhibits with sound. We bring exhibits to life. Established in 1990, Vista Group is a Woman Owned Small Business providing a broad range of exhibit audio devices and interactive systems.
